

Visit to Central Research Institute for Complex Use of Water Resources (CRICUWR)

On 1–4 February 2012, dr. Irena Kriščiukaitienė, Virginia Namiotko and Tomas Baležentis, the researchers of the Division of Farms and Economics Enterprises of the Lithuanian Institute of Agrarian Economics (LIAE), who implement EU–funded project Baltic COMPASS, visited project partner from Belarus – Central Research Institute for Complex Use of Water Resources (CRICUWR).

Standing from left to right – the researchers of the LIAE Tomas Baležentis and Virginia Namiotko, the researcher of the CRICUWR Aliaksandr Pakhomau and the researcher of the LIAE dr. Irena Kriščiukaitienė.

The researchers collected the data about the number of livestock, the intensity of mineral and organic fertilizers in the Belarusian regions situated in the Nemunas and Neris river basins (sub-basins) and wrote the paper.
